

REBATES FOR HIGH-EFFICIENCY FAN DESIGN

Rebates for high-efficiency commercial and industrial fan system design based on FEI rating

The Air Movement and Control Association International (AMCA) recently established new Fan Energy Index (FEI) metrics which have been adopted into the 2019 edition of American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) 90.1, Energy Standard for Buildings.

To help our customers who are interested in designing high-efficiency fan systems, we're pleased to offer rebates for commercial and industrial fan systems designed with qualifying FEI ratings. A wide range of new and retrofit fan types are eligible for these incentives.

QUALIFIERS FOR COMMERCIAL & INDUSTRIAL FAN REBATES

Qualifying fan types	Horsepower (hp) range	Minimum qualifying FEI
<ul style="list-style-type: none"> • Axial cylindrical housed • Centrifugal housed 	10 hp or less	1.12
<ul style="list-style-type: none"> • Centrifugal unhoused • Inline and mixed flow 	15 hp to 60 hp	1.22
<ul style="list-style-type: none"> • Panel • Power roof ventilator 	75 hp to 200 hp	1.27

See rebate levels listed on the next page and other qualifying details.

Types of industries that can benefit from installing high-efficiency fan systems

- Data Centers
- Hospitals
- Retail stores
- Hotels/motels
- Offices
- Warehouses
- Grocery stores
- Restaurants
- Universities

Who can earn rebates on qualifying FEI-rated fans?

Eligible customers are businesses in the Xcel Energy Colorado electric service territory; those that receive electrical service under a non-residential rate class from Xcel Energy.

Where can the qualifying fans be installed?

Your new qualifying FEI-rated fan must be installed in your facility that's located in Xcel Energy's Colorado electric service territory.

EXAMPLE OF A COMMERCIAL FAN REBATE

DOE fan type:	Centrifugal housed
Horsepower:	75
Equipment description:	1.27 FEI rated fan with integrated VFD
Xcel Energy rebate:	\$7,140

Questions?

Connect with your account manager or our team of energy advisors at **855-839-8862** with any questions. Visit **xcelenergy.com** to learn more.

REBATES FOR HIGH-EFFICIENCY FAN DESIGN

When do I get my rebate?

Once the fans are installed and operating in your facility, submit the rebate application via the Digital Application Process (DAP). After it's submitted, you can expect to receive a rebate check in the mail within six to eight weeks.

How are rebate amounts calculated?

An Xcel Energy account representative can provide you with guidance on selecting qualifying equipment and verifying rebate amounts before you purchase your equipment. You can also use the chart below to estimate your rebate amount.

Rebate levels for qualifying high-efficiency commercial and industrial fans.

Rebates are available to our commercial customers located in our Colorado electric territory. Invoices for qualifying fans and fan systems must be dated on or after April 1, 2021.

Rebate levels for fans only			Rebate levels for fans with an integrated VFD		
Fan hp	Minimum FEI rating	Rebate amount	Fan hp	Minimum FEI rating	Rebate amount
1	1.12	\$120	1	1.12	\$520
1.5		\$160	1.5		\$660
2		\$180	2		\$730
3		\$200	3		\$800
5		\$220	5		\$1,120
7.5		\$240	7.5		\$1,370
10		\$260	10		\$1,610
15	1.22	\$300	15	1.22	\$2,100
20		\$320	20		\$2,620
25		\$360	25		\$3,110
30		\$380	30		\$3,580
40		\$420	40		\$4,420
50		\$460	50		\$5,360
60		\$500	60		\$6,100
75	1.27	\$540	75	1.27	\$7,140
100		\$600	100		\$8,300
125		\$640	125		\$9,240
150		\$820	150		\$10,320
200		\$1,100	200		\$11,600

Note: Fans with horsepower greater than 200 may qualify for a rebate through our Custom Efficiency program. Custom rebates require application submittal before equipment order, purchase, or installation.
