LED rebate worksheet

Indoor Grow Lighting Installations

Prescriptive rebates are available for retrofit and new construction indoor agricultural grow lighting projects invoiced on or after September 1, 2022. Rebates are only available for LED grow lighting equipment. Please contact an Xcel Energy account manager or call our Business Solutions Center at 855-839-8862 for additional questions.

New Equipment	Specifications	Rebate/Unit	Qty. =	Rebate				
LED indoor horticultural lighting Rebates are based on total fixture wattage. Photosynthetic photon flux (PPF) rating for the equipment being installed must be noted on the equipment specification sheets. Greenhouse applications and LED-to-LED upgrades are not eligible through this measure but can still qualify for a custom rebate. If you are upgrading your lighting in various grow rooms please utilize more than one line item. Fixtures must have a minimum photosynthetic photon efficacy of 1.8 µmol/J.								
LED indoor horticulture lighting	Wattage per fixture Fixture PPF rating	\$0.70/watt installed						
LED indoor horticulture lighting	Wattage per fixture Fixture PPF rating	\$0.70/watt installed						
LED indoor horticulture lighting	Wattage per fixture Fixture PPF rating	\$0.70/watt installed						
		Total rebate						

If replacing existing equipment, please note which type of equipment you are replacing. If it is a new construction project, please select "new construction/not applicable."

HPS CMH MH Fluorescent New construction/not applicable

Cost worksheet

Enter the total equipment and labor costs for each individual product. An individual product is defined as a specific lighting technology with a single wattage value or a lighting control.

Equipment	Fixture wattage, or wattage connected	Qty. =	Total equipment cost	Total labor cost
Example: 2x4 LED Troffer	25	4	\$100	\$100
Example: Occupancy control	100	1	\$100	\$100

Business customer information

1. Rebate details

Complete the rebate application. All information needs to be supplied before a rebate check can be issued.

Rebate items must be installed on the Xcel Energy electric account listed on the application. Equipment must meet specification requirements and be purchased installed and operating prior to submitting an application for a rebate.

2. Itemized invoice

Include detailed installation invoice that includes:

- Invoice number and date
- Customer premises number or installation address
- Manufacturer names and model numbers for installed equipment
- Equipment quantities
- Equipment cost per unit
- Labor cost listed seperately from equipment costs. Labor costs must reflect actual labor costs. If equipment was self-installed, please include a labor cost based on the install time and rate of pay of the installer.
- If the rebate is being paid to a vendor or service provider, the customer's expected rebate amount must be detailed on the invoice.

3. Facility characteristic definitions

Cannabis/marijuana flower room: Cannabis plants are in the flower/bloom stage of growth

Cannabis/marijuana vegetative room: Cannabis plants are in the early grow/pre-bloom stages of growth

Flowering room (for non-cannabis plants): Plants are in the flower/bloom stage of growth

Vegetative/propagation room (for non-cannabis plants): Plants are in the early grow/pre-bloom stages of growth -typically to breed seedlings for replanting **Microgreens:** Mini lettuce - Early growth stage of the plant.

4. Submittal

Please submit forms to an account manager (if applicable). If there is not an Xcel Energy account manager on the account, please email forms to: EnergyEfficiency@xcelenergy.com (preferred), or fax to 800-311-0050, or mail to: Xcel Energy, Energy Efficiency Specialists, P.O. Box 8, Eau Claire, WI 54702.

Rules and requirements information

Xcel Energy provides energy efficiency rebates for the purchase and installation of qualifying lighting equipment. Additional lighting rebates, not listed on this application, may be available through our Custom Efficiency program which requires preapproval. Please contact an Xcel Energy account manager or call our Business Solutions Center at 855-839-8862 for custom lighting project review prior to beginning the project.

Business Energy Assessment – Agricultural Program

The Business Energy Assessment Agricultural Program program provides qualifying customers with an audit and implementation support including support finding a contractor and submitting your rebate application. For more information on this program please call 855-839-8862 or visit xcelenergy.com.

Customer qualifications

This program applies to customers with a valid Xcel Energy commercial account in our Colorado electric service territory. Check the Xcel Energy website (xcelenergy.com) to verify eliqibility.

Eligibility requirements

- Rebate items must be installed on the Xcel Energy electric account listed on the application
- All equipment must be new; used or rebuilt equipment is not eligible for a rebate.
- Equipment must meet specification requirements and be purchased, installed and operating prior to submitting an application for a rebate.
- Rebates cannot exceed 60% of the project cost (including equipment and labor). The minimum rebate is \$5.

- A signed application and detailed installation invoice(s) must be submitted to Xcel Energy.
 The prescriptive rebates available for retrofit and new construction indoor agricultural grow lighting projects are only available for projects with invoices dated on or after September 1, 2022. Invoice(s) submitted must include itemized quantity, price, manufacturer's make and model numbers, and product codes for each material item and original equipment manufacturer (OEM) specification sheets. Please contact an account manager or call our Business Solutions Center at 855-839-8862 for additional date restriction details.
- Xcel Energy is not responsible for any lost, late, stolen, ineligible, illegible, misdirected
 or postage-due mail. All completed submissions become the property of Xcel Energy
 and will not be returned. Warning: Fraudulent submission of form may result in federal
 prosecution for mail fraud under 18 USC section 1341, 1342.
- Xcel Energy will issue rebates in the form of checks if no other option is selected on the rebate application. Once completed paperwork is submitted, incentive payments are usually made in six to eight weeks.
- Equipment must meet the technical requirements listed in this application form.
 Xcel Energy reserves the right to withhold payment for products that do not meet the requirements.
- Xcel Energy reserves the right to inspect customer facility(ies) for installation of
 materials listed on this rebate application and will need access to survey the installed
 project. Customer should keep a sample of any/all types of equipment removed, for a
 period of three (3) months after receiving a rebate from Xcel Energy. If the inspection
 finds that the project does not comply with program rules and standards, any rebate
 received must be returned to Xcel Energy.
- Xcel Energy's conservation rebate programs are subject to 60 days notice of changes and cancellation. The customer and contractor are responsible for checking with an account manager or call the Business Solutions Center at 855-839-8862 to ask whether or not the program is still in effect and to verify program parameters.
- Xcel Energy reserves the right to publicize participation in this program, unless specifically requested otherwise.
- Xcel Energy reserves the right to refuse payment and participation if the customer or contractor violates program rules and procedures. Xcel Energy is not liable for rebates promised to customers as a result of a contractor misrepresenting the program.

Warranty information

Xcel Energy:

- a. Does not endorse any particular manufacturer, product or system design by offering these rebates:
- b. Is not responsible for any tax liability imposed on the customer as a result of the payment of rebates;
- c. Does not expressly or implicitly warrant the performance of installed equipment (contact your contractor for detailed equipment warranties);
- d. Is not responsible for the proper disposal/recycling of any waste generated as a result of this project;
- e. Is not liable for any damage caused by the operation or malfunction of the installed equipment; and
- f. Does not guarantee that a specific level of energy or cost savings will result from the implementation of energy conservation measures or the use of products funded under this program.
