| SNN-2 | Workpapers (Filename: SNN-2.xlsx) |

| 1 | | I. WITNESS IDENTIFICATION AND QUALIFICATIONS |
|----|----|---|
| 2 | Q. | Please state your name and business address. |
| 3 | A. | My name is Stephanie N. Niemi. My business address is 1800 Larimer Street, |
| 4 | | Denver, Colorado 80202. |
| 5 | Q. | On whose behalf are you testifying in this proceeding? |
| 6 | A. | I am filing testimony on behalf of Southwestern Public Service Company, a New |
| 7 | | Mexico corporation ("SPS") and wholly-owned electric utility subsidiary of Xcel |
| 8 | | Energy Inc. ("Xcel Energy"). |
| 9 | Q. | By whom are you employed and in what position? |
| 10 | A. | I am employed by Xcel Energy Services Inc. ("XES"), the service company |
| 11 | | subsidiary of Xcel Energy, as Manager of Revenue Analysis. |
| 12 | Q. | Please briefly outline your responsibilities as Manager of Revenue Analysis. |
| 13 | A. | I provide project supervision and technical expertise for jurisdictional cost of |
| 14 | | service studies, revenue requirement determinations, and related projects for the |
| 15 | | Xcel Energy Operating Companies ¹ . |

¹Xcel Energy is the parent company of four utility operating companies: Northern States Power Company, a Minnesota corporation; Northern States Power Company, a Wisconsin corporation; Public Service Company of Colorado, a Colorado corporation; and SPS.

1 **Q**. Please describe your educational background. 2 A. I graduated from University of Northern Colorado in 2006 with a Bachelor's degree 3 in Business Administration, with an emphasis in Finance and Management. 4 **Q**. Please describe your professional experience. 5 A. From 2008 through 2015, I worked for a municipal water utility in the Denver area, 6 Denver Water. While at Denver Water, in my progression to a senior level rate 7 analyst, I gained an extensive knowledge of utility operations, from long-term 8 financial planning and budgeting through rate design. I was involved in 9 implementing an improved cost-of-service methodology that ensured an equitable 10 distribution of costs, while maintaining predictability and transparency. I 11 performed extensive analysis as Denver Water undertook transitioning to a new, 12 more impartial conservation-based rate design. Throughout these changes to cost 13 of-service and rate design, I was responsible for communication and outreach to 14 citizens' committees, retail and wholesale entities, and the Board of Water 15 Commissioners. In 2015, I joined XES as a Principal Rate Analyst and assumed 16 my current role in May 2020.

iii

1 Q. Have you testified before any regulatory authorities?

A. Yes. I have filed testimony before the New Mexico Public Regulation Commission
("Commission") in Case Nos. 20-00238-UT, 21-00148-UT, and 22-00286-UT
before the Public Utility Commission of Texas ("PUCT") in Docket Nos. 51802,
52451, and 54634 and before the Federal Energy Regulatory Commission
("FERC") in Docket No. ER18-228-000.

1

II. <u>RESPONSIBILITIES AND RECOMMENDATIONS</u>

2 Q. What are your responsibilities in this proceeding?

I support SPS's cost of service for its 2025-2027 Transportation Electrification Plan 3 A. 4 ("TEP"). As part of my assignment in this proceeding, my testimony discusses 5 issues related to depreciation of the assets in the 2025-2027 TEP, including how they will be recorded in SPS's books and records and the depreciation rates used to 6 7 calculate depreciation expense on the assets. I then go on to describe SPS's 8 proposed cost recovery approach. Next, I will describe the proposed rider, including the costs that are included in the revenue requirement calculation. 9 10 Finally, I present the revenue requirement for the 2025 Electric Vehicle 11 Infrastructure Rider ("EV Rider") and an illustrative revenue requirement for the 12 2026 and 2027 EV rider.

13 Q. Please summarize the recommendations in your testimony.

A. I recommend the Commission approve SPS's EV rider revenue requirement
 calculation, which is described in detail later in my testimony. The revenue
 requirement calculation methodology forecasts the revenue requirement prior to
 each calendar year, which is then trued up to actual costs. SPS proposes to utilize
 its most recently approved cost of debt and capital structure in the revenue
 requirement calculation. The costs included in the revenue requirement calculation

| 1 | include the plant placed in service, the associated plant-related costs of depreciation | | |
|---|---|--|--|
| 2 | expense, accumulated depreciation, and accumulated deferred income tax | | |
| 3 | ("ADIT"), operations and maintenance ("O&M") expense, income tax expense, | | |
| 4 | and the cost of rebates provided to customers for installation of the necessary | | |
| 5 | equipment. The return on equity ("ROE") used in the calculation is the then-current | | |
| 6 | ROE approved in SPS's most recent base rate case. Currently, the ROE is 9.50%. | | |
| 7 | The proposed revenue requirement calculation will credit any revenues generated | | |
| 8 | from the usage of SPS-owned public charging stations to the extent they are | | |
| 9 | received. | | |

10I also recommend the Commission continue the depreciation rates for the11TEP assets that were approved in SPS's initial TEP case, Case No. 20-00150-UT.12Finally, I recommend the Commission approve the 2025 estimated revenue13requirement, which will be trued up using actual costs in 2026. In accordance with14the Commission's determination in Case No. 20-00150-UT, the 2026 and 202715revenue requirements do not need to be approved at this time because they can be16reviewed when SPS files updated revenue requirements in its October 1 filings.²

² See Case No. 20-00150-UT, Recommended Decision at 83 (Aug. 2, 2021); Final Order Adopting Recommended Decision with Modifications (Sept. 22, 2021).

1 Q. Were Attachments SNN-1 and SNN-2 prepared by you or under your direct

- 2 supervision and control?
- 3 A. Yes.

1

III. <u>DEPRECIATION</u>

2 Q. Please describe the assets that are included in the TEP.

A. There are four main categories of assets included in the TEP: software, supply
infrastructure, chargers, and distribution capital projects. The software enables SPS
to monitor the chargers. The supply infrastructure is the wiring and conduit from
the customer's meter to the charger. The charger is the device that plugs into the
electric vehicle to charge it. SPS witness Brianne R. Jole describes SPS's
distribution capital projects in her direct testimony.

9 Q. Is SPS requesting new depreciation rates for the assets included in the TEP?

A. No, SPS proposes to continue the depreciation rates that were approved in SPS's
initial TEP filing, Case No. 20-00150-UT. Although SPS is proposing to include
distribution investment in this case, it already has approved depreciation rates for
these categories of capital assets.

14 Q. In what FERC Accounts will these assets be recorded and what depreciation 15 rate will be applied to the assets?

A. The software will be recorded in FERC Account 303, which is the account for
 Miscellaneous intangible plant. The supply infrastructure will be recorded in FERC
 Account 369, which is the account for Services. The chargers will be recorded in

| 1 | FERC Account 371, which is Installations on customers' premises. Software and |
|---|---|
| 2 | supply infrastructure will be depreciated using the approved depreciation rates for |
| 3 | FERC Accounts 303 and 369 as the software and supply infrastructure are similar |
| 4 | to the assets already in those accounts. SPS's distribution investments will be |
| 5 | recorded in various distribution FERC Accounts 360-371 and depreciated using the |
| 6 | corresponding approved depreciation rates for the specific FERC Account. SPS |
| 7 | will comply with all FERC Account changes effective January 1, 2025 relating to |
| 8 | FERC order 898. |

1 IV. COST RECOVERY APPROACH AND DESCRIPTION OF RIDER

2 Q. How is SPS proposing to recover the costs incurred under the TEP?

A. SPS proposes to utilize a rider to recover the costs of the TEP. Section 62-8-12
 NMSA ("EV Statute") and 17.9.574.11(E)(3) NMAC provide utilities the option of

5 utilizing a commission-approved tariff rider to recover the costs of the TEP.

6 Q. Please describe SPS's proposed rider.

As approved by the Commission in Case No. 20-00150-UT, SPS proposes an EV 7 A. 8 Rider. SPS proposes to recover capital and O&M costs through the rider and that 9 the rider be effective for three years starting January 1, 2025, to coincide with the time period of the proposed TEP³. The proposed rider will utilize forecasted 10 11 information to calculate a projected revenue requirement, which is then charged for 12 the upcoming year. On October 1 of each year, SPS will file the projected revenue 13 requirement and rates with the Commission. Once the year is completed, the 14 projected revenue requirement will be trued-up to actual costs and SPS will file the 15 true-up on August 1 of each year. The true-up will also reconcile projected revenue

³ The three-year time period is the period over which SPS will offer the EV products and services to its customers. The final year of the TEP will still be trued up to actual costs even though the true up will occur after the initial three-year period.

| | | Stephanie IV. Ivienn |
|----|----|---|
| 1 | | to actual revenue. Any true up amounts will be included in the October 1 filing as |
| 2 | | an adjustment to the projected revenue requirement. |
| 3 | Q. | What will be included in the EV Rider? |
| 4 | A. | SPS is proposing to include both capital investments and O&M in the rider, as well |
| 5 | | as the cost of rebates. The costs in this rider will be offset by revenue from SPS- |
| 6 | | operated public charging stations collected through SPS's Public Electric Vehicle |
| 7 | | Charging Service tariff, which is discussed by SPS witness Alexander G. |
| 8 | | Trowbridge in his direct testimony. |
| 9 | Q. | Please describe the capital investments included in the rider. |
| 10 | A. | The capital investments include plant in service, accumulated depreciation, ADIT, |
| 11 | | and depreciation expense. The capital investments included in rate base will use a |
| 12 | | 13-month average methodology as the rider uses a forecasted test year with a true- |
| 13 | | up. |
| 14 | Q. | What is SPS proposing to use as the cost of capital in the EV rider? |
| 15 | A. | The capital recovered in this rider is included in the revenue requirement through |
| 16 | | the return and depreciation expense components of the revenue requirement. In |
| 17 | | order to calculate the return component, a weighted average cost of capital |
| 18 | | ("WACC") is necessary. SPS proposes to use its current WACC of 7.17%, which |
| | | |

| 1 | | was approved in Case No. 22-00286-UT. That WACC is based on a ROE of 9.50%, |
|----|----|---|
| 2 | | a cost of debt of 4.34% and a capital structure consisting of 54.70% equity and |
| 3 | | 45.30% debt. To the extent that the approved WACC changes during the TEP |
| 4 | | horizon, SPS will reflect the currently-approved WACC in the EV rider. |
| 5 | Q. | Please describe the O&M expenses included in the rider. |
| 6 | А. | The O&M expenses recovered in the rider include maintenance of the assets, the |
| 7 | | energy costs incurred at SPS-owned charging stations, customer education and |
| 8 | | outreach, advisory services, the cost of rebates, and program evaluation. SPS |
| 9 | | witness Patrick J. Murphy describes these expenses in his direct testimony. |
| 10 | Q. | Please describe how the cost of rebates is included in the rider. |
| 11 | А. | Under the EV Statute, utilities are authorized to recover the reasonable costs for |
| 12 | | measures to expand transportation electrification through a tariff rider. As part of |
| 13 | | its TEP, SPS proposes to issue rebates for the installation of charging equipment. |
| 14 | | As explained by SPS witness Jeremiah W. Cunningham and as was approved in |
| 15 | | Case No. 20-00150-UT, ⁴ SPS proposes to include the cost of the rebates as |
| 16 | | regulatory assets in rate base. When a rebate is paid by SPS, it will be recorded as |

 $^{^4}$ Case No. 20-00150-UT, Final Order Adopting Recommended Decision with Modifications at 12.

| 1 | | a regulatory asset and included in rate base. The regulatory asset will then be |
|----|----|---|
| 2 | | amortized over time and the amortization expense will also be included in the rider |
| 3 | | revenue requirement. This methodology is consistent with the manner in which |
| 4 | | plant is included in rate base. The regulatory asset included in rate base will also |
| 5 | | be calculated on a 13-month average, consistent with the plant included in rate base. |
| 6 | Q. | What amortization period is SPS proposing for the rebate regulatory asset? |
| 7 | A. | As the Commission approved in SPS's prior TEP case, Case No. 20-00150-UT, |
| 8 | | SPS proposes using a ten-year amortization period for the rebates. This period is |
| 9 | | the duration of the contract signed by customers who obtain chargers from SPS. |
| 10 | | Furthermore, the rebates proposed in the TEP are primarily designed to incentivize |
| 11 | | and support the installation of EV chargers, which have an expected useful life of |
| 12 | | 10 years. This in effect matches the cost of the rebate with the benefits provided |
| 13 | | by the charging equipment. |

- 1 **Q**. You mentioned that revenues generated by company-owned public charging 2 stations will be included in the rider as a credit to the revenue requirement. 3 Please describe the revenue credit.
- 4 A. Any revenue generated by the use of company-owned public charging stations will 5 be credited against the revenue requirement.
- 6 **Q**. **Does SPS propose to apply interest to the EV Rider?**
- 7 A. Yes. SPS proposes to use the annual customer deposit interest rate set by the 8 Commission under Section 62-13-13 of the PUA and 17.9.560.12(B)(2)(A) NMAC 9 to assess symmetrical carrying charges. Each year, SPS will use the new customer 10 deposit interest rate set by the Commission. If SPS's expenditures exceed its 11 revenues, then the carrying charges will be negative (SPS earns interest), whereas 12 if the revenues exceed expenditures, the carrying charges will be positive (SPS pays 13 interest). The inclusion of symmetrical interest on rider reconciliations has been 14 approved by the Commission for use by SPS in both its energy efficiency and 15 renewable portfolio standard riders.
- 16 **Q**.
 - Why is it appropriate to calculate interest?
- 17 Interest is appropriate due to the timing differences and application of the A. 18 reconciliation balance. That is, there will be a somewhat significant lag for the

| 1 | correction of the EV Rider balance. For example, under SPS's proposal, the 2025 |
|---|---|
| 2 | balance will be calculated and reviewed in 2026 and then collected/returned in |
| 3 | 2027. In total, there will be a two-year difference between the first accrual and the |
| 4 | last balance. Accordingly, reasonable carrying charges (which are symmetrical |
| 5 | between SPS and its customers) should continue to be applied. |

1

V. <u>2025-2027 PROGRAM REVENUE REQUIREMENTS</u>

2 Q. Have you calculated a revenue requirement for the TEP?

- 3 A. Yes. Using the budget presented by Mr. Murphy, I have calculated the estimated
- 4 revenue requirement for each year of the plan. The revenue requirement for each
- 5 of the years is presented in the table below.

| | 2025 | 2026 | 2027 |
|---------------------|-------------|-------------|-------------|
| Revenue Requirement | \$1,615,082 | \$2,486,541 | \$3,805,677 |

6 Attachment SNN-1 is the revenue requirement model used to calculate the above

7 revenue requirement.

8 Q. Does this conclude your pre-filed direct testimony?

9 A. Yes.

BEFORE THE NEW MEXICO PUBLIC REGULATION COMMISSION

| IN THE MATTER OF SOUTHWESTERN PUBLIC SERVICE COMPANY'S APPLICATION FOR APPROVAL OF ITS 2025-2027 TRANSPORTATION ELECTRIFICATION PLAN; PROPOSED PLAN RIDERS AND CREDIT; AND OTHER ASSOCIATED RELIEF, SOUTHWESTERN PUBLIC SERVICE | Case No. 24-00UT |
|--|------------------|
| COMPANY, () APPLICANT. () | |
|) | |

VERIFICATION

On this day, April 1, 2024, I, Stephanie N. Niemi, swear and affirm under penalty of perjury under the law of the State of New Mexico, that my testimony contained in Direct Testimony of Stephanie N. Niemi is true and correct.

<u>/s/Stephanie N. Niemi</u> STEPHANIE N. NIEMI
