Communities Served by Xcel Energy	16

Xcel Energy developed this handbook as a general guideline for residential contractors. Building processes vary by state and not all procedures as stated apply to every region. The information in this guide should not be construed as an exception to standards, regulations and publicly filed tariffs already set forth. It is advised that you consult with your Xcel Energy design representative for complete requirements as they apply to your jurisdiction. We hope you find this guide helpful and we welcome any suggestions or comments you may have.

Please submit to: BCLCO@xcelenergy.com

WELCOME, DEVELOPERS!

Xcel Energy has many programs and services designed to help you generate more business. Here are just a few of the advantages of having Xcel Energy as your energy provider. It's a good business decision you'll appreciate for years to come.

- Convenience. You'll have one contact for natural gas and electricity service and construction.*
- **Joint trenching.** Xcel Energy is committed to installing utilities in a joint trench wherever possible. We will work as the coordinator for joint trench utilities in your new developments, including natural gas, electricity, cable TV and telephone.*
- Installation of electric facilities. We reserve the right to install these facilities in a permanent location. In large (acreage) lot developments, where the home locations can vary significantly, transformer and secondary facility locations cannot be determined until the specific home sites have been determined. Because of this, Xcel Energy can only install the electric primary cable (backbone system) during the initial installation. Individual transformer and secondary facilities will be installed as home locations are determined. The developer will be charged up front for the costs of this backbone system installation. When home locations are determined and transformers and secondary facilities are installed, developers may receive a full or partial refund on their initial payment, based on the construction allowance and the associated revenues. Please work with your project designer to determine these upfront charges.

For all electric installations, developers should follow the installation standards listed in the "Xcel Energy Standard for Electric Installation and Use." You can download this document at www.xcelenergy.com/Energy_Partners/Builders_&_Developers/Service then see Standards for Electric Installation and Use Manual (Blue Book). For electricity metering standard guestions, contact the Metering Technical Support Line at **1-800-422-0782**.

- **Double-mained projects.** In new developments, natural gas mains are installed on both sides of the street (dependent on average lot frontage), offering builders the convenience of year-round availability at the site.
- **Outdoor street lighting.** We'll work with you from the start to plan, coordinate and install street lighting in your development. Please contact your Xcel Energy designer for specific design requirements.

But there are many additional benefits to working with Xcel Energy. The homeowners who buy homes in your development will appreciate being able to take advantage of:

- Competitive low-cost natural gas and electricity.
- Convenient payment programs such as Averaged Monthly Payment and Auto Pay.
- The convenience of receiving just one monthly bill in Xcel Energy's natural gas and electricity service areas.
- Rebates for installing energy-efficient equipment.

*Single point of contact and joint trenching available in some areas. Subject to review on a case-by-case basis.

DEVELOPERS PROCESS

FOR NATURAL GAS AND ELECTRICITY SERVICE

Simply mail:

- A completed development application (page 5);
- Send application only. Forward plats to assigned designer.

Local office address:

Xcel Energy

Attn: Builders Call Line

5460 W. 60th Avenue

Arvada, CO 80003

BCLCO@xcelenergy.com

Hours: 7 a.m. – 4 p.m. Mountain Time

Please note: Your Xcel Energy designer will let you know if agreements or contracts must be processed prior to installation.

FOR NATURAL GAS AND ELECTRICITY SERVICE

the **BUILDERS CALL LINE** is open Monday through Friday.

Phone: 1-800-628-2121 Email: BCLCO@xcelenergy.com Fax: 1-800-628-2521

Website: xcelenergy.com

To obtain a downloadable application online, go to

xcelenergy.com/Energy_Partners/Builders_&_Developers/Service_Activation.

- 1. From the menu on the left, choose **Service Activation**.
- 2. Colorado Service Activation for Builders
- 3. Plat Submittal Form

XCEL ENERGY RESIDENTIAL DEVELOPMENT SITE READINESS CHECKLIST:

Bef	ore we install service in your development, please make sure the following items are complete:
	Upon receiving the Xcel Energy utility design, please verify that utility locations do not conflict with driveways, sidewalks, garages, fire hydrants, etc. If you have any questions or concerns, please call your Xcel Energy design representative.
	Major utilities installed, including sewer and water.
	Site is within six inches of final grade in installation area and cable routes.
	Block numbers and lot corners are identified and staked.
	In some areas, if required by the city, curbs should be installed and the first layer of blacktop laid down. If curbing is not required, the point of termination must be backfilled properly and to grade, with a layer of Class 5 as a road base.
	Area cleared between street and property line.
	No topsoil or straw placed on area. Xcel Energy is not responsible for restoring topsoil, seed, straw or sod, if it is placed prior to our installation.

OUTDOOR LIGHTING

Xcel Energy Outdoor Lighting has a full-service package with complete project management to help you create an environment that is secure and aesthetically pleasing to attract new residents to your projects. Here are just a few reasons for choosing our program to meet all your outdoor lighting needs.

EXPERTS:

Provide a full-service turnkey package that includes:

- Design
- Coordination with utilities, roadwork or other projects
- Complete as-built construction sketch of finished project

Joint trench or independent projects have a variety of installation options and equipment choices and are tailored to your needs.

Quality products are installed by experienced crews to ensure a reliable system, from poles to fixtures to the electrical infrastructure.

Professional crews follow all local ordinances and electrical codes, performing in an efficient manner using the highest standards and safest practices.

APPLY FOR STREETLIGHTS:

You can apply for street lighting on the application on page 5 (under the Project Information section) or contact the Builders Call Line at **1-800-628-2121.** If you have an existing distribution project in the design process, contact your design representative.

WELCOME, BUILDERS!

Xcel Energy has many programs and services designed to help you generate more business. Here are just a few of the advantages of having Xcel Energy as your energy provider:

- Convenience. You'll have one initial contact for natural gas and electricity service and construction.*
- Joint trenching. Xcel Energy is committed to installing natural gas and electricity services along with cable TV
 and telephone in a joint trench wherever possible.*
- Double-mained projects are available in most of our service area. In new developments with lots of one acre or smaller, Xcel Energy has natural gas mains on both sides of the street so natural gas is available to your site all year round.

But there are many additional benefits to working with Xcel Energy. Customers who buy your homes will appreciate being able to take advantage of:

- Low-cost natural gas and electricity.
- Convenient payment programs such as Averaged Monthly Payment and Auto Pay.
- The convenience of receiving just one monthly bill in Xcel Energy's natural gas and electric service areas.
- Rebates for installing energy-efficient equipment.

*Single point of contact and joint trenching available in most areas. Subject to review on a case-by-case basis.

BUILDERS PROCESS

FOR NATURAL GAS AND ELECTRICITY SERVICE

STEP 1 Apply for gas and electricity services using the application provided on pages 10–11. Fax, mail or email your completed service application to Xcel Energy's Builders Call Line. Refer to page 3 for mailing address, fax, email and phone number. Please contact us before you dig the foundation.

STEP 2 You will receive written confirmation of your application and builder site readiness requirements. Please share this information with your electrician and/or heating contractor.

STEP 3 Most inspection releases are called or faxed in by the city, community or county inspector to the inspection desk. (Not all entities provide inspection releases to our inspection desk.)

STEP 4 To make your installation easier, please provide Xcel Energy with a clear service path until your service installation is complete.

Site is within six inches of final grade.

INSTALLATION

Electricity — All communities require an inspection by a city, county or state inspector. Some communities require that an electrical inspection be completed for a permanent meter to be set. Procedures on how inspections are submitted vary. (Refer to page 15.)

Natural Gas – All building gas line plumbing requires an inspection by the local governing agency. Some gas services will have a meter set at the time the service lateral is installed. Loads and area specifics will determine the installation process. (Refer to page 15.)

Joint Trench — We install services in a joint trench whenever possible. For joint trenching, natural gas and electricity meter locations are preferred to be on the same side of the house as the electric stub, pole, transformer or pedestal. This process is subject to review on a case-by-case basis.

The **BUILDERS CALL LINE** is open Monday through Friday, 7 a.m.-4 p.m. Mountain Time.

Phone: 1-800-628-2121 Email: BCLCO@xcelenergy.com Fax: 1-800-628-2521

Website: xcelenergy.com

To obtain a downloadable application online, go to

xcelenergy.com/Energy_Partners/Builders_&_Developers/Service_Activation.

- 1. From the menu on the left, choose **Service Activation**.
- 2. Colorado Activation for Builders.
- 3. Online Service Activation form (commercial and residential)

REQUIREMENTS FOR SITE READINESS

FOR SERVICES TO THE HOME

Please contact us before you begin digging your basement foundation so we can more effectively meet your service installation scheduling requirements.

SITE-READY REQUIREMENTS

Prior to Xcel Energy service installation, please make sure the following are completed at the site:

- A 10-foot wide path must be clear of all obstacles from the meter to the energy source (pole, transformer, pedestal, electric stub or natural gas service tee) point of termination.
- Electric meter socket is installed. Please refer to the "Xcel Energy Standard for Electric Installation and Use" document for requirements in your area. To view or download a copy, go to xcelenergy.com/Energy_Partners/ Builders_&_Developers/Service then see Standards for Electric Installation and Use Manual (Blue Book).
- Site is within six inches of final grade.
- Privately owned underground facilities are located. Xcel Energy is not responsible for damage to privately owned underground facilities that are not properly located by the customer.
- Foundation is in and backfilling is complete.
- Riser location is clearly marked.
- See page 14 for minimum clearance information.

We recommend you apply for services when you dig your foundation. If you do not have distribution or there are construction concerns, application is necessary well before digging begins. This allows Xcel Energy to provide service to the home in a timely fashion.

Thank you for your cooperation. If you have any questions, please call the Builders Call Line at 1-800-628-2121.

SERVICE RESTORATION

Xcel Energy will work with you to resolve any excessive or major damage caused by Xcel Energy crews or contractors. If you are concerned about the condition of your property after service work, call your Xcel Energy design representative for assistance.

- Customer-owned facilities must be located and identified by customer
- 2. Indicate distances for meters from nearest corner of building.
- **3.** Preferred meter location is on same side of house as Xcel Energy source.
- 4. Inspection must be complete before service is energized.
- **5.** If no Inspector, Proof of Compliance (Electric) and/or Certificate of Compliance (Gas) must be complete.
- **6.** Site must be within 4 to 6 inches of final grade (for new construction) and a clear 10-foot-wide path from Xcel Energy source to meter.
- 7. Winter construction charges may apply from 10/1 to 4/15.
- **8.** Water and sewer must be installed prior to electric or gas service.

 $\textit{Meter Conflict Zone} \ \text{any potential area for a deck, patio, pool, etc.}$

STANDARD AND WINTER CONSTRUCTION CHARGES

In most cases, Xcel Energy can install services all year. However, you can avoid winter construction charges by having your site ready for service before winter conditions exist.

Winter conditions include any of the following:

- Thirteen (13) or more inches of frost
- If snow removal or plowing is required to install service
- Adverse soil conditions exist

The construction crew foreman will determine whether winter conditions exist prior to installing your service. Where severe winter conditions exist, the customer may choose to take temporary service. The designer will provide you with a cost estimate.

If a natural gas main is not available on the side of the street on which you are building, notify Xcel Energy so we can make the necessary arrangements to serve you.

Standard installation is considered an installation of a service lateral only. (Gas service laterals are facilities installed from the gas main to the Xcel Energy designated delivery point of connection to the customer's structures. Electricity service laterals are underground or overhead secondary voltage conductors from the transformer or the closest underground pedestal to the Xcel Energy designated customer's electricity service entrance equipment.) Therefore, installation of any necessary additional cable, transformer and/or other equipment is considered non-standard and must be individually priced. Consideration of these charges should be determined prior to lot pricing. Contact the Builders Call Line for further assistance.

You may incur additional charges for surface or subsurface conditions that impede the installation of distribution facility.

STANDARD AND FROST CONSTRUCTION CHARGES*

	C(0	
	Standard Construction Charges, All laterals are based on an estimate per the Tariffs (See page 12 for definition of standard installation)	Frost Construction Charges* (Effective year-round)
Natural Gas	Standard Service: A standardized Matrix will be used on residential gas services that meet the following requirements: • Under one hundred feet (100') in length • 1¼" and under pipe • All other services (residential or commercial) will be designed *** The Matrix requires the following information: • City or County for Permit, is a permit required? • Region • Pipe size • Approximate length — <70', <100' • Metering Pressure • Restoration Required • Traffic Control Required • Number of Meters A Construction Allowance* is awarded upfront on all services and customers must pay the non-refundable payment prior to construction. Residential Service Lateral Portion	If customer approves installation during frost conditions through the use of a Frost Agreement they will be charged \$2.00 per linear foot when frost is deeper than twelve (12) inches of frost.
	Service Lateral Portion \$1,122/meter Distribution Portion \$3.43/DTH	
Electricity	Standard Service: A standardized Matrix will be used on underground residential electric services that meet the following requirements: • Under two hundred feet (200') in length • 4/0 wire or smaller conductor • 320 A or less meter housing • All other services (commercial or residential) will be designed *** The Matrix requires the following information: • Region • Panel Size (200A or 320A) • Approximate length - <70', <100', <150', <200' • UG Service fed from OH Secondary • Xcel or customer-installed Conduit • Multiple Meters (up to five)	If customer approves installation during frost conditions through the use of a Frost Agreement they will be charged \$2.00 per linear foot when frost is deeper than twelve (12) inches of frost.
	A Construction Allowance* is awarded upfront on all services and customer must pay the non-refundable payment prior to construction. Residential Service Lateral Portion \$170/meter Distribution Portion \$920/meter Commercial (C,NMTR) Less than 25kW Service Lateral Portion \$280/meter Distribution Portion \$1,290/meter Commercial (SG) More than 25kW Service Lateral Portion \$1,650/meter Distribution Portion \$270/kW	
Joint Trench	For gas and electricity distribution and services installed in the same trench, the customer will pay the electric trench costs, cost of lift for separation and cost of gas pipe. There could be other costs such as the necessity of a wider trench and compaction.	

^{*}Winter Construction Charges are subject to change.

**Construction Allowance is set forth through Commission-approved rate filings and are subject to change.

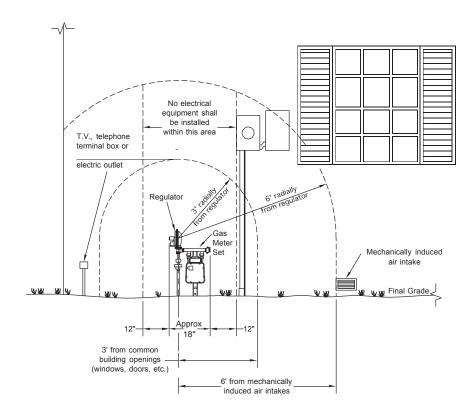

***Prices may vary on additional charges such as: system pressure, compaction, hand trenching, sod removal, etc.

NATURAL GAS AND ELECTRICITY RESIDENTIAL SERVICE

Natural gas meters and regulators should be at least three feet (measured radially) from any source of ignition, such as electric switches and air-conditioning units. You must also maintain the three-foot distance from doors, windows, vents and air intakes (20 feet from a power intake), outside water spigots and garage doors. In areas where city water is not available, the natural gas service line must be a minimum of 15 feet from a water well. Xcel Energy sets meters about six inches above final grade to allow slight changes in grade and landscaping around the meter without interfering with meter mechanisms. Note: Meters cannot be set under a deck or steps. The electric meter must be installed according to all electrical codes and applicable regulations. For joint trenching, both the natural gas and electric meter are preferred to be on the same side of the house.

DRAWING CR-10

CLEARANCE REQUIREMENTS FROM GAS METER

NOTES:

- 1. 3' minimum working clearance from non-electrical obstructions is preferred around gas meter set.
- 2. Disregard clearances when measuring around corners of structure.
- 3. See drawings SC-20 and SC-20A for ice and snow shield requirements.
- 4. Electric and plastic gas services within the same trench shall be separated by twelve (12) radial inches. Steel gas services shall not be installed in the same trench with an electric service and require a minimum of twelve (12) radial inches of separation.

Acel Energy	Mar-13	Jan-13	JD		I-7.1	PAGE I-7.1

ELECTRICITY INSPECTION REQUIREMENTS

To learn about local communities' inspection requirements for your area, call your local inspection agency.

COLORADO

All communities require an inspection by a city, county or state inspector. Electric inspections are required for a permanent meter installation. Procedures on how inspections are submitted vary. Some cities and counties fax in the information or call it in to the appropriate personnel at Xcel Energy. Electrical work completed by a homeowner or a non-licensed person must have an inspection completed by the city, state or county inspector for that area.

NATURAL GAS INSPECTION REQUIREMENTS

To learn about local communities' inspection requirements for your area, call your local gas inspector.

COLORADO

The meter may be set if an approved inspection has been received. Procedures on how inspections are submitted vary. Some cities and counties fax in the information or call it in to the appropriate personnel at Xcel Energy. A few counties leave the inspection tag at the meter site. Please contact the Builders Call Line at **1-800-628-2121** to confirm an inspection has been completed. Often times, meter canes are installed in conjunction with the service lateral. Once the service installation is complete and the house side gas plumbing is inspected and tagged, your contractor will break the seal and turn on the service.
