

HOME ENERGY AUDIT

Save Big With a Little Help From Your Friends

Let Xcel Energy's experts help you determine ways to save energy and money in your home. For only \$60, you can get a Standard Home Energy Audit (\$200 value), which includes a visit from one of Xcel Energy's contracted energy experts who will identify energy efficiency opportunities in your home and develop a personalized plan of action for you.

A Standard Home Energy Audit includes a review of your attic, insulation, doors, windows, furnace or boiler, appliances and more. The audit identifies energy waste resulting from:

- Drafty windows
- Insufficient insulation
- Humidity problems
- Inefficient appliances
- Poor ventilation
- Inefficient heating & cooling systems

The Standard Audit (including blower door test) usually takes about two to three hours. You and the auditor will set up an appointment time that's convenient for you. Audit results may include recommendations for new appliances or upgraded heating or cooling equipment. If you choose to make these improvements, Xcel Energy may be able to help you reduce your costs even further with rebates for qualifying products and services.

Xcel Energy offers three types of audits: a Home Walkthrough (\$30), Standard Audit (\$60) and Standard Audit with Infrared* (\$100). Please note that a Standard Audit or Standard Audit with Infrared is required to qualify for the Home Performance Rebates program.

To request a Home Energy Audit or for more information, call **1-800-895-4999** or sign up online at xcelenergy.com/HomeEnergyAudit.

*To qualify for the Standard Audit with Infrared in Minnesota, customer must be a natural gas customer of Xcel Energy or an electric customer of Xcel Energy with a primary heat source that is electric.
